

Suggested written discharge advice card for people aged over 12 years who have sustained a head injury

We think that it is all right for you to leave hospital now. We have checked your symptoms and you seem well on the road to recovery. When you get home it is very unlikely that you will have any further problems. But if any of the following symptoms do return we suggest you come back, or get someone to take you to your nearest hospital A&E department as soon as possible:

- unconsciousness, or lack of full consciousness (for example, problems keeping eyes open)
- any confusion (not knowing where you are, getting things muddled up)
- any drowsiness (feeling sleepy) that goes on for longer than 1 hour when you would normally be wide awake
- difficulty waking up
- any problems understanding or speaking
- any loss of balance or problems walking
- any weakness in one or more arms or legs
- any problems with your eyesight
- very painful headache that won't go away
- any vomiting – getting sick
- any fits (collapsing or passing out suddenly)
- clear fluid coming out of your ear or nose
- new bleeding from one or both ears
- new deafness in one or both ears.

Things you shouldn't worry about

You may experience some other symptoms over the next few days, which should disappear in the next 2 weeks. These include a mild headache, feeling sick (without vomiting), dizziness, irritability or bad temper, problems concentrating or problems with your memory, tiredness, lack of appetite or problems sleeping. If you feel very concerned about any of these symptoms in the first few days after discharge, you should go and see your own doctor to talk about them. **If these problems do not go away after 2 weeks, you**

should go and see your doctor. We would also recommend that you seek a doctor's opinion about your ability to drive a car or motorbike.

Things that will help you get better

If you follow this advice you should get better more quickly and it may help any symptoms you have to go away.

- DO NOT stay at home alone for the first 48 hours after leaving hospital.
- DO make sure you stay within easy reach of a telephone and medical help.
- DO have plenty of rest and avoid stressful situations.
- DO NOT take any alcohol or drugs.
- DO NOT take sleeping pills, sedatives or tranquillisers unless they are given by a doctor.
- DO NOT play any contact sport (for example, rugby or football) for at least 3 weeks without talking to your doctor first.
- DO NOT return to your normal school, college or work activity until you feel you have completely recovered.
- DO NOT drive a car or motorbike, ride a bicycle, or operate machinery unless you feel you have completely recovered.

Telephone number to call at the hospital_____

Long-term problems

Most patients recover quickly from their accident and experience no long-term problems. However, some patients only develop problems after a few weeks or months. **If you start to feel that things are not quite right (for example, memory problems, not feeling yourself), then please contact your doctor as soon as possible so that he/she can make sure you are recovering properly.**

Suggested written discharge advice card for carers of children who have sustained a head injury

We think that it is all right for your child to leave hospital now. We have checked their symptoms and they seem well on the road to recovery. When you get them home it is very unlikely that they will have any further problems. But if any of the following symptoms do return we suggest you take them to their nearest hospital A&E department as soon as possible:

- unconsciousness, or lack of full consciousness (for example, problems keeping eyes open)
- any confusion (not knowing where they are, getting things muddled up)
- any drowsiness (feeling sleepy) that goes on for longer than 1 hour when they would normally be wide awake
- difficulty waking them up
- any problems understanding or speaking
- any loss of balance or problems walking
- any weakness in one or more arms or legs
- any problems with their eyesight
- very painful headache that won't go away
- any vomiting – getting sick
- any fits (collapsing or passing out suddenly)
- clear fluid coming out of their ear or nose
- new bleeding from one or both ears
- new deafness in one or both ears.
